The cakes sold for _____ dollars each.

4

If corn sells at 2 ears
for 8 cents, one ear is
worth _____ cents.

5 women had lunch together and divided the bill equally.

The total bill was 5 dollars.

Each woman paid $\left\{ \begin{array}{l} 1 \text{ dollar.} \\ 2 \text{ dollars.} \end{array} \right.$

1 dollar

A newspaper boy receives 2 dollars for every new customer he finds.

Last week he received 6 dollars for finding new customers.

3

How many new customers did he find last week? _____

Billy is 3 years old. His sister is 5 years old. Let's find the average age of the children.

$3 + 5 = 8$

To do this, first add their ages: $__ + __ = __$

Now divide the answer by the number of children.

How many children are there? _____

So: $8 \div 2 = __$

Their average age is 4 years.
