Tables show information in an organized way to help you find what you need quickly.

Amount of Television Watched by People Age 2-17

<i>hours per day</i>	<i>number of people</i>
Less than 1	1,010,000
2	12,760,000
3	25,840,000
4	13,910,000
5 or more	1,540,000

- The table’s **title** tells you what the information is about.
- The **headings** show what information is listed.
- The information is organized for you in the **body** of the table.

Example: To find how many people age 2-17 watch television 4 hours per day, look down the column *hours per day* until you find 4. Then look across to the right. You find that 13,910,000 people age 2-17 watch television 4 hours per day.

Use the table to answer the questions.

1. How many entries are listed under *hours per day*? _____
2. How many hours per day do most people under 18 watch television? _____
3. How many hours per day do the least number of people under age 18 watch television? _____
4. How many watch 5 or more hours of television per day? _____
5. How many watch 3 or fewer hours of television per day? _____
6. How many people age 2-17 were surveyed? _____

Here's the menu and a tax table from the Star Diner.

Star Diner Menu

Specials		
Hamburger	\$3.25	Fish
